

# Amended ElecLink Capacity Split 2023

## Revision 2

As set out in the [ElecLink Splitting Rules Methodology](#), ElecLink shall publish its capacity split for each delivery year on ElecLink's website and/or on JAO's website, and this notice fulfils this requirement.

Timeframe	MW
Annual 2023	450MW
Seasonal	Summer 2023: 150MW
	Winter 2023/24: 150MW
Quarterly	Quarter 1: 100MW
	Quarters 2,3,4: 150MW
Monthly	January, February, March, July, August: 50MW
	All other months: 100MW
Day-ahead	July & August: 200MW
	All other periods: 150MW

The amendment relates exclusively to the capacity allocated in July & August. The monthly capacity for each of July & August has been reduced by 50MW (from 100MW to 50MW) whereas the Day-ahead capacity has been increased by 50MW (from 150MW to 200MW) for the months of July and August only. The amended capacity split has been designed to reflect the low demand of the market for summer monthly products.
