

Amended ElecLink Capacity Split 2024

As set out in the [ElecLink Splitting Rules Methodology](#), ElecLink shall publish its capacity split for each delivery year on ElecLink's website and/or on JAO's website, and this notice fulfils this requirement.

Timeframe	MW
Annual 2024	500MW
Seasonal	150MW
Quarterly	Quarter 1: 100MW
	All other quarters: 150MW
Monthly	February & March: 150MW
	All other months: 100MW
Day Ahead	January: 150MW
	All other periods: 100MW

The amendment relates to the capacity allocated to the Day Ahead, Monthly and Seasonal Products. The volume of the Day Ahead product has been reduced by 50MW (from 150MW to 100MW) for all periods with the exclusion of January. Additionally, the February & March Monthly products along with the Winter and Summer Seasonal products have been increased by 50MW (from 100MW to 150MW). The Amended Capacity Split has been designed to reflect the increased market demand for long term products.
